

Landing page:

Sign In (Operator)

Username  
test1234

Password  
\*\*\*\*\*

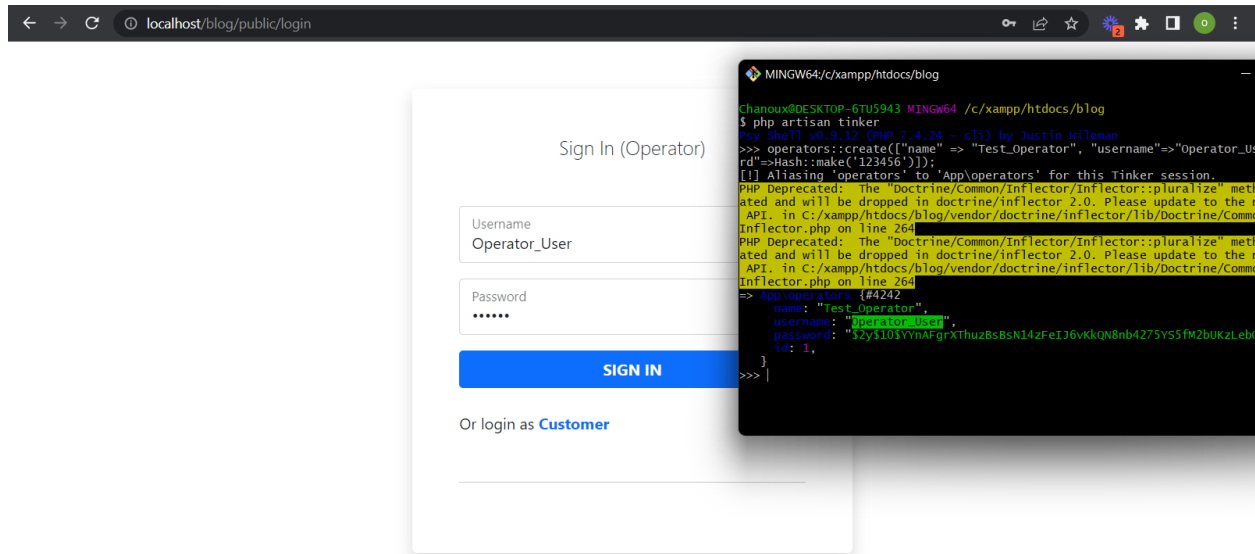

**SIGN IN**

Or login as [Customer](#)

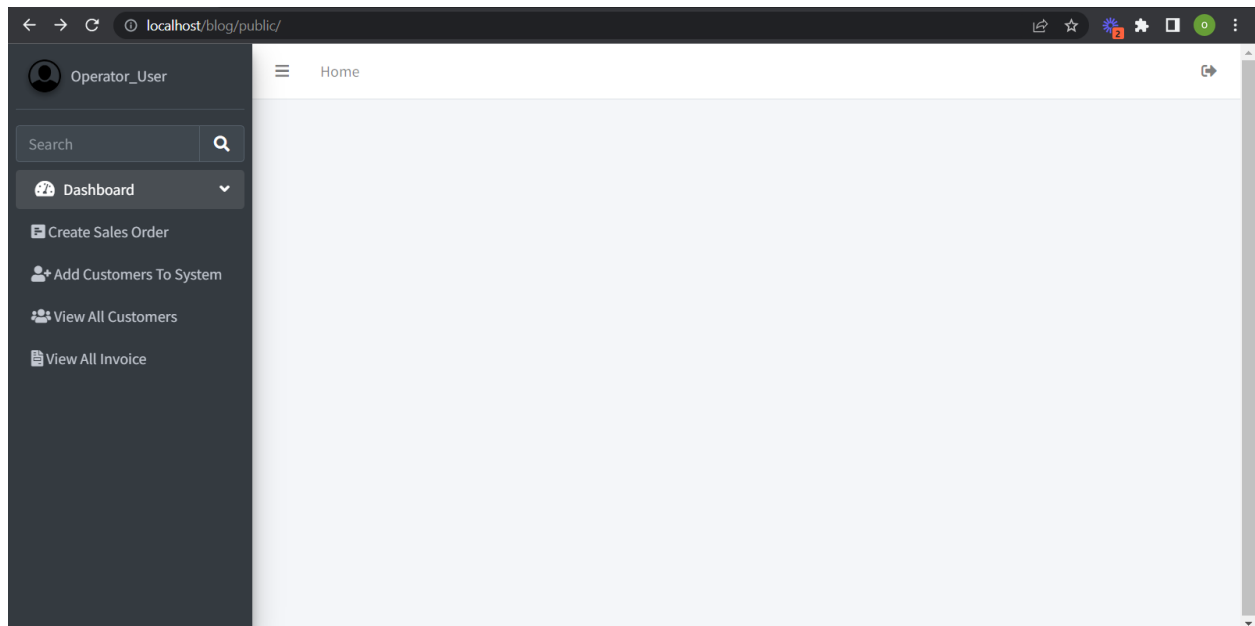

As we initiate the process there's no user registered in the system so we generate credentials for an operate through cli

```
MINGW64:/c:/xampp/htdocs/blog
Chanoux@DESKTOP-6TU5943 MINGW64 /c:/xampp/htdocs/blog
$ php artisan tinker
Psy Shell v0.9.12 (PHP 7.4.24 - cli) by Justin Hileman
>>> operators::create(["name" => "Test_Operator", "username"=>"Operator_User", "password"=>Hash::make('123456')]);
[!] Aliasing 'operators' to 'App\operators' for this Tinker session.

Back to login screen and log in with credentials created

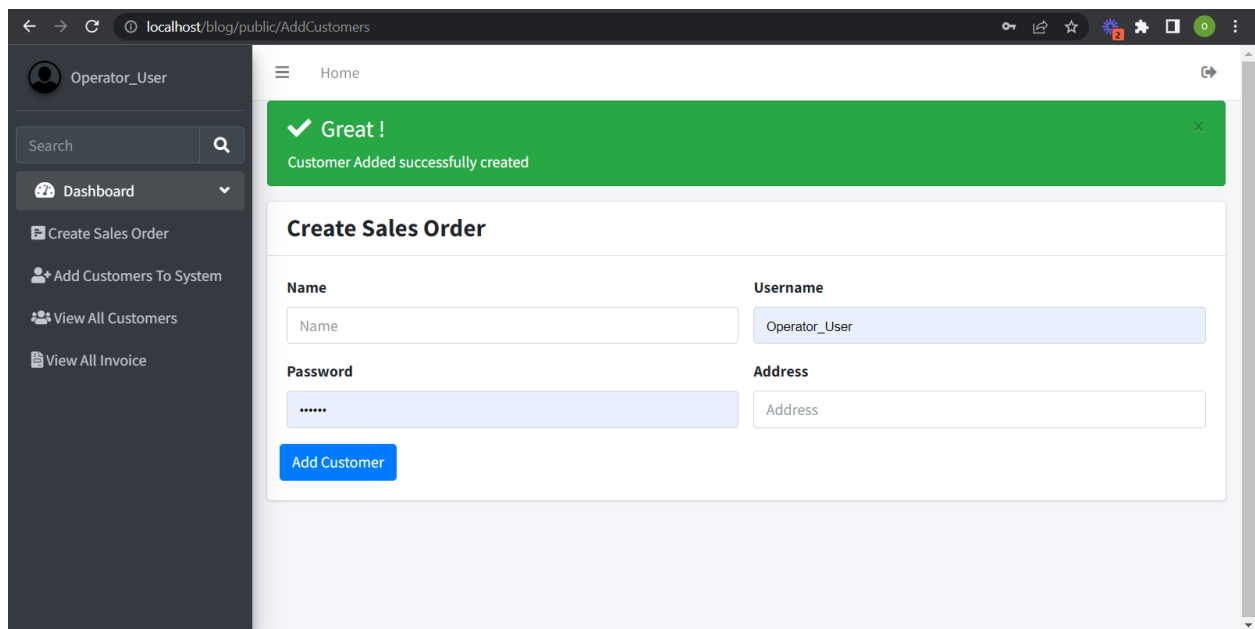

Our landing page /dashboard once logged in :

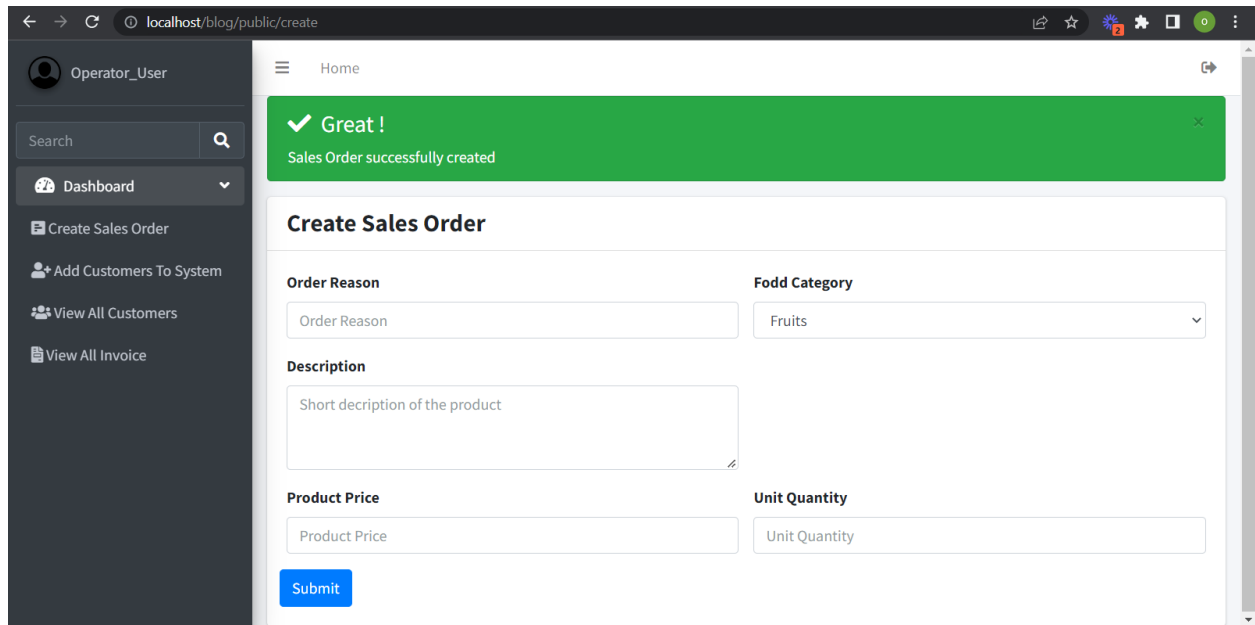

The Operator to create Credentials for customer/s :

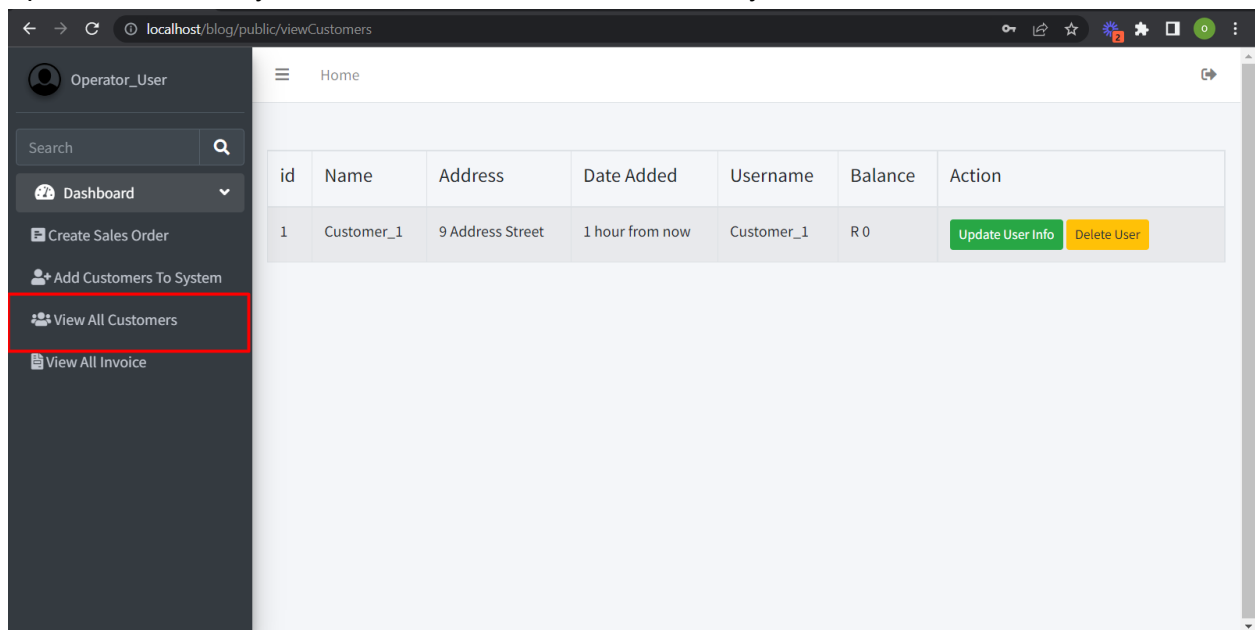

//

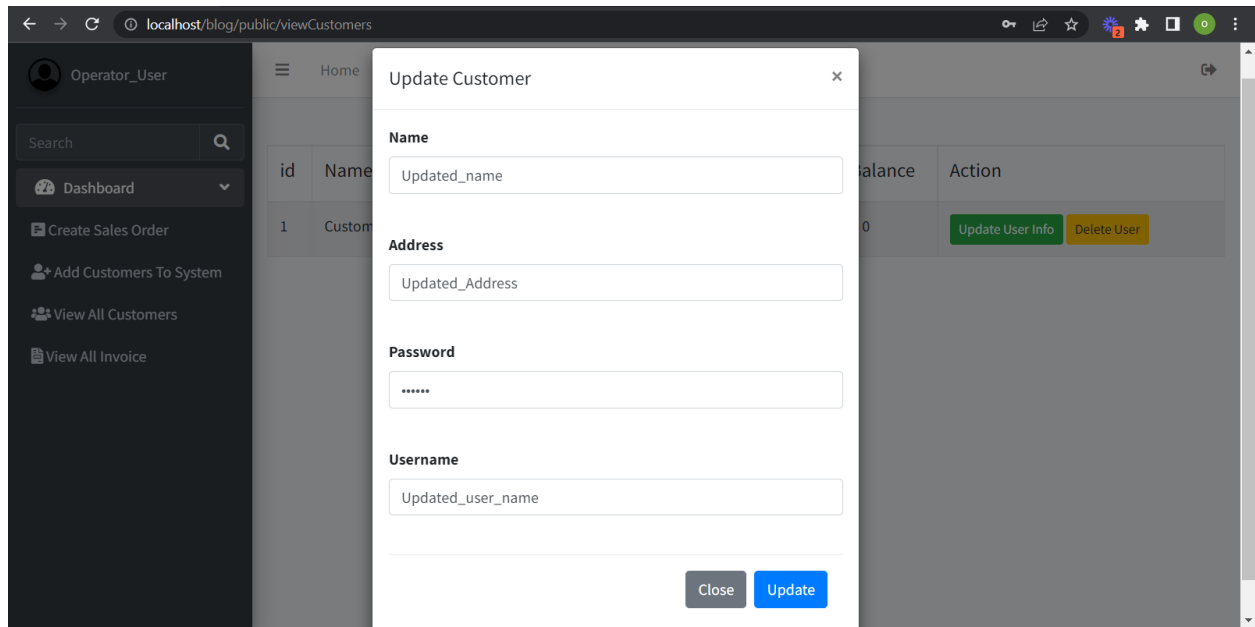

Once user Added to system the operator can now create a sales order through which an invoice will/can be generated

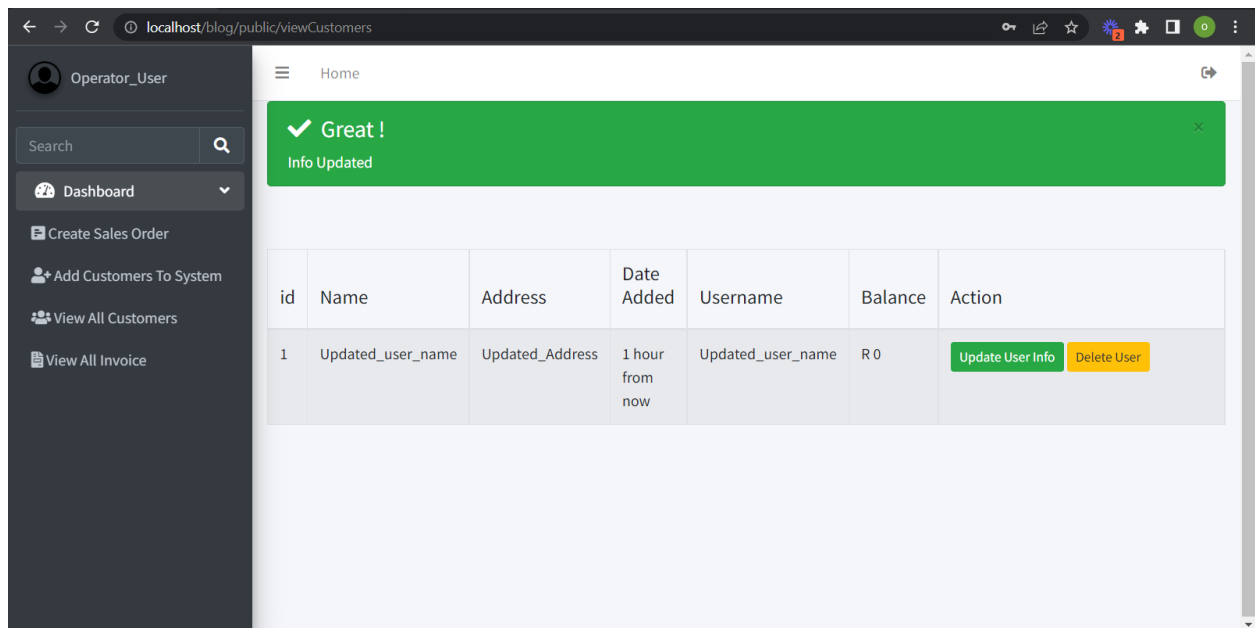

Operator can modify or remove the customer/s from the system

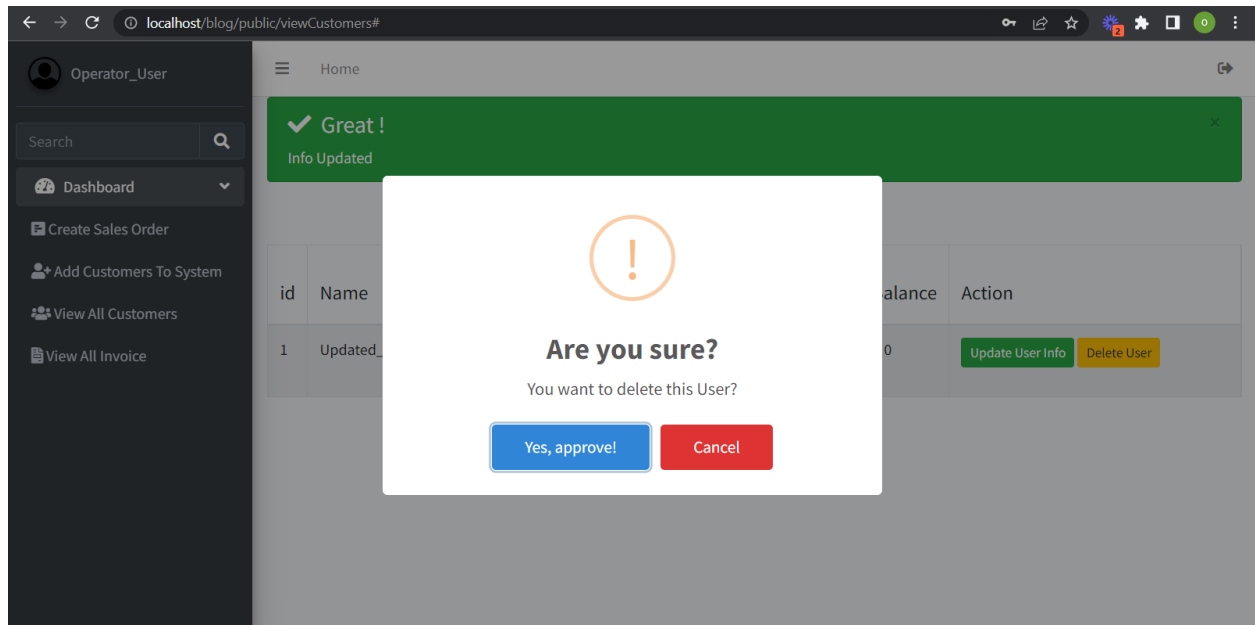

//

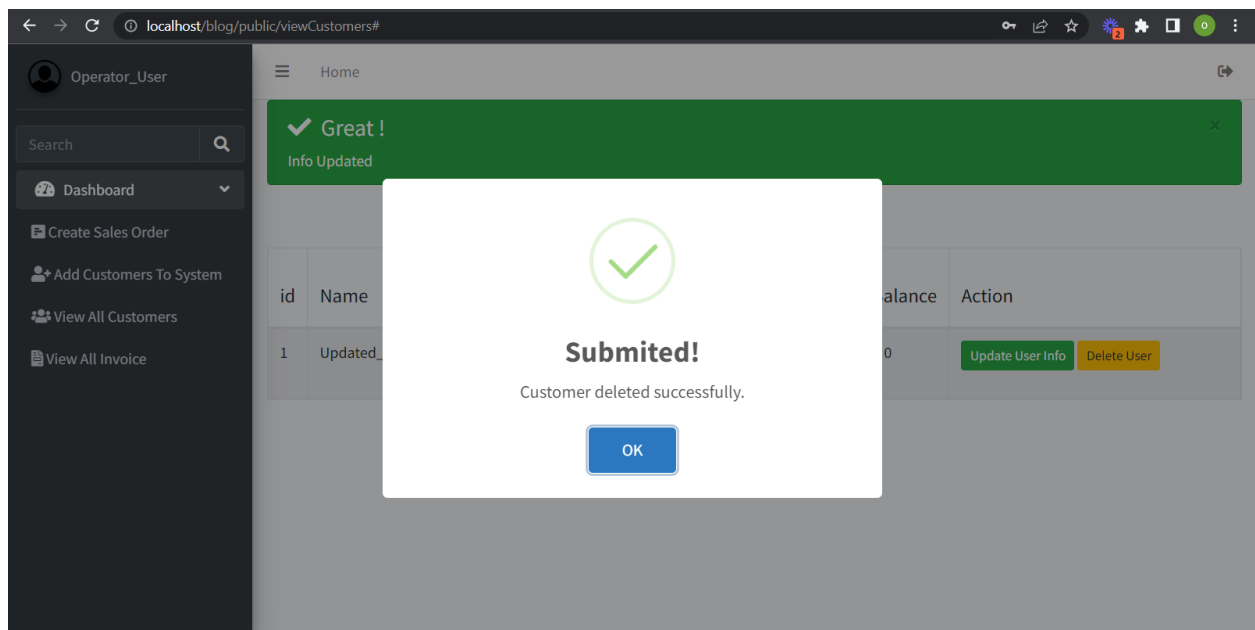

//

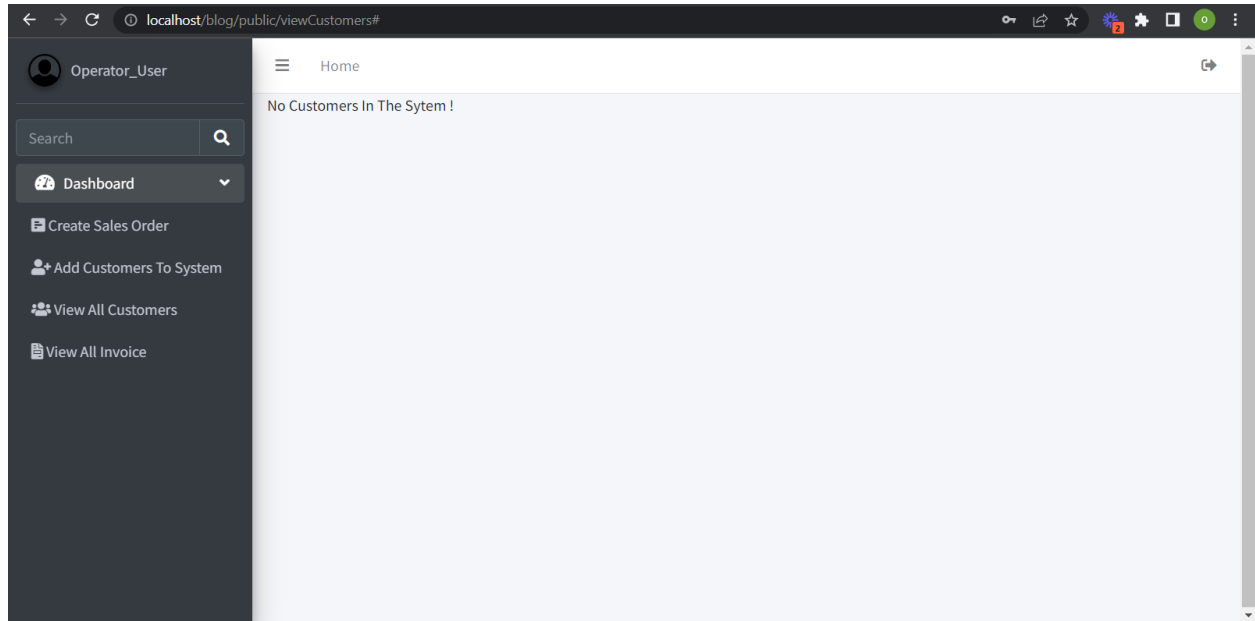

// Delete Customer

//

//

Please find the rest of the visual presentation on this link I've made a loom for a better understanding:
